**Sign Up:**

usage: sign_up email, password, password_confirmation, host="http://localhost:3000"
ex:      sign_up "user@provider.com", "123123", "123123", "http://localhost:3000"

return: String: umid
ex:      "6oIgEseEmQCZjWD1Nli6qQ"

**Sign Up Oauth:**

usage: sign_up_oauth uid, strategy, host='http://localhost:3000'
ex:      sign_up_oauth 'h832he27' , :facebook, 'http://localhost:3000'

return: String: umid
ex:      "6oIgEseEmQCZjWD1Nli6qQ"

**Log in:**

usage:  log_in email, password, host='http://localhost:3000'
ex:      log_in 'user@provider.com', '123123', 'http://localhost:3000'

return: Hash: { String: umid, String: session }
ex:      {"umid"=>"OzZdTbo6gQVsYKDGq-6klg", "session"=>"YVOmi8FxVlA8rDBRrbW7tw"}

**Log in Oauth:**

usage:  log_in_oauth uid, strategy, host='http://localhost:3000'
ex:      log_in_oauth 'e9283eu', :facebook, 'http://localhost:3000'

return: Hash: { String: umid, String: session }
ex:      {"umid"=>"OzZdTbo6gQVsYKDGq-6klg", "session"=>"YVOmi8FxVlA8rDBRrbW7tw"}

**Log out:**

usage:  log_out umid, host='http://localhost:3000'
ex:      log_out umid, host='http://localhost:3000'

return: String: status
ex:      "user logged out"

**User info:**

usage:  user_info session, host='http://localhost:3000'
ex:      user_info 'YVOmi8FxVlA8rDBRrbW7tw', 'http://localhost:3000'

return: Hash: { String: email, String: umid }
ex:      {"email"=>"test@test.com", "umid"=>"OzZdTbo6gQVsYKDGq-6klg"}

**Add Strategy:**

usage:  add_strategy uid, strategy, umid, session, host='http://localhost:3000'
ex:      add_strategy '8ye7y283e', :linkedin, 'GDEqFC1qgnGOFnTB83gZNA', '7o9hyLVf7IUP5ZVoqp00Rw', 'http://localhost:3000'

return: String: status
ex:      "Strategy added successfully"

**Remove Strategy:**

usage: remove_strategy , strategy, session, host='http://localhost:3000'
ex: remove_strategy 'GDEqFC1qgnGOFnTB83gZNA', :linkedin, '7o9hyLVf7IUP5ZVoqp00Rw', 'http://localhost:3000'

return: String: status
ex:      "Strategy removed successfully"

**Delete user:**

usage:  delete_user umid, session, host='http://localhost:3000'
ex:      delete_user 'GDEqFC1qgnGOFnTB83gZNA', '7o9hyLVf7IUP5ZVoqp00Rw', 'http://localhost:3000'

return: String: umid
ex:      "6oIgEseEmQCZjWD1Nli6qQ"

**Change Password:**

usage:  change_password user, password, new_pw, new_pw_confirm, session, host='http://localhost:3000'
ex:      change_password 'wakku@live.com', '123123', '123456', '123456', 'uxWksIcaH5iwWRXi3hggew', 'http://localhost:3000'

return: String: status
ex:      "Password updated"

**Reset Password Request:**

usage:  reset_password_request email, host='http://localhost:3000'
ex:      reset_password_request 'wakku@live.com', 'http://localhost:3000'

return: String: reset_token
ex:      "JA9bQr0OgrgxK7kdFA89KQ"
(you should send this token to the user's email, and then the user should send u this token, to be used
in the function below)

**Reset Password:**

usage:  reset_password reset_token, new_pw, new_pw_confirm, host='http://localhost:3000'
ex:      reset_password "JA9bQr0OgrgxK7kdFA89KQ", '123123', '123123', 'http://localhost:3000'

return: String: status
ex:      "Password updated"

**Change email:**

usage:  change_email user, password, new_email, new_email_confirm, session, host='http://localhost:3000'
ex:       change_email 'wakku@live.com', '123123', 'wakku@live.it', 'wakku@live.it', 'uxWksIcaH5iwWRXi3hggew', 'http://localhost:3000'

return: String: status
ex:       "e-mail updated"
